Journal of Paleolimnology 5, 291, 1991.

Volume contents

C. D. Sandgren: Crysophyte reproduction and resting cysts: a paleolimnologist's primer 1
P. A. Siver: The stomatocyst of *Mallomonas acaroides* v. *muskokana* (Chrysophyceae) 11
M. Rybak, I. Rybak & K. Nicholls: Sedimentary chrysophycean cyst assemblages as paleoindicators in acid sensitive lakes 19
K. E. Duff & J. P. Smol: Morphological descriptions and stratigraphic distributions of the chrysophycean stomatocysts from a recently acidified lake (Adirondack Park, N.Y.) 73
L. V. Benson: Timing of the last highstand of Lake Lahontan 115
M. Hickman & C. E. Schweger: Oscillaxanthin and myxoxanthophyll in two cores from Lake Wabamun, Alberta, Canada 127
D. R. Engstrom, C. Whitlock, S. C. Fritz & H. E. Wright, Jr.: Recent environmental changes inferred from the sediments of small lakes in Yellowstone's northern range 139
R. J. Flower: Field calibration and performance of sediment traps in a eutrophic holomictic lake 175
Book review 189
Announcement 195
S. E. Metcalfe, F. A. Street-Perrott, R. A. Perrott & D. D. Harkness: Palaeolimnology of the Upper Lerma Basin, Central Mexico: a record of climatic change and anthropogenic disturbance since 11600 yr BP 197
P. A. Siver: Implications for improving paleolimnological inference models utilizing scale-bearing siliceous algae: transforming scale counts to cell counts 219
F. Mees, D. Verschuren, R. Nijs & H. Dumont: Holocene evolution of the crater lake at Malha, Northwest Sudan 227
T. E. Rhodes: A paleolimnological record of anthropogenic disturbances at Holmes Lake, Adirondack Mountains, New York 255
B. A. Zeeb & J. P. Smol: Paleolimnological investigation of the effects of road salt seepage on scaled chrysophytes in Fonda Lake, Michigan 263
D. F. Charles, S. S. Dixit, B. F. Cumming & J. P. Smol: Variability in diatom and chrysophyte assemblages and inferred pH: paleolimnological studies of Big Moose Lake, New York, USA 267
Note: J. R. Glew: Miniature gravity corer for recovering short sediment cores 285
Book review 289
